Summary of Examiner's Interview on October 15, 1998

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

This paper is being submitted to provide a complete written statement as to the substance of a telephone interview between the undersigned and Examiner Jeffrey Fredman on October 15, 1998.

The undersigned called Examiner Fredman to determine whether or not a deposit of the MSB-1, PEM12 and c-H-abl clones would be necessary to satisfy the enablement or best mode requirements for patentability. Examiner Fredman indicated that a deposit was not necessary as the specification as filed was enabling for the claims.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "RMA" followed by a stylized flourish.

Richard A. Nakashima
